DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, 28, and 30-43, drawn to a system and method of selectively establishing communication with one of plural devices associated with a single telephone number is provided, classified in class 379, subclass 201 and 211.02.
 - II. Claims 19-27, 29, 44-51, drawn to a method of operating a telephone call from a wireless telephone into a telecommunication network location having a single line telephone interface that connect to a wireless connect unit, classified in class 455, subclass 445.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of selectively establishing communication with one of plural devices associated with a single telephone number is provided does not require the use of wireless equipments. The subcombination has separate utility such as a method of operating a telephone call from a wireless telephone into a telecommunication network location having a single line telephone interface that connect to a wireless connect unit.

Art Unit: 2642

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Attorney William E. Powell, III on 01/06/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
